Grooved Pipe Coupling

PT COUPLING COMPANY's Aluminum Grooved Pipe Couplings are designed for a cost effective alternative to heavy duty grooved pipe couplings. The tank truck industry standard couplings feature serrated stud bolts and nuts to help prevent loosening from vibration. The integrated stud bolts give the operator the advantage for a quick and easy assembly.

PT Aluminum Grooved Pipe Couplings can be used on any grooved pipe connection that does not require high pressure and heavy duty connection of a traditional iron pipe grooved coupling.

- 2" GPC is rated up to 400PSI
- 3" GPC is rated up to 200PSI
- 4" GPC is rated up to 150PSI

Seals are available in **Viton®** or **Buna**
