HIGH ENERGY ORANGE

Rhino Hyde® High Energy Orange is a long-lasting, premium urethane formulation specially designed for small-particle impingement abrasion. Developed in 1979, it's still a top choice for use in humid, damp and wet conditions where ordinary formulations can break down. **High Energy Orange combines high-rebound properties, outstanding hydrolytic stability and a low coefficient of friction to deliver superior abrasion resistance in the most demanding conditions.**

**SUCCESSFULLY FIELD TESTED FOR DECADES,
HIGH ENERGY ORANGE IS IDEALLY SUITED TO HANDLE GRAIN, FERTILIZER, SAND AND OTHER FINE PARTICLES.**

Just like with our Original Rhino Hyde Blue, **Rhino Hyde High Energy Orange is available in various thicknesses, with a variety of backings, and even with an embedded ceramic featuring an expanded backing.**

WHAT MAKES HIGH ENERGY ORANGE TOUGH TO BEAT:

- // FDA compliant for dry bulk food handling
- // European Law EC 1935/2010 compliant
- // High rebound characteristics that reduce wear and product damage
- // Longer wear in wet, humid environments
- // Available in rolls or sheets
- // Resists chemical breakdown due to moisture
- // Low coefficient of friction for less sticking and build-up
- // Specially designed vertical molds ensure uniform thickness
- // Lightweight build
- // Available with ceramic chips for extended life
- // Sheet thicknesses from ¼" to 1"
- // All Rhino Hyde Products materials are always tested to ASTM* standards
