## STANDING AGAINST COUNTERFEIT BEARINGS

The JTEKT hologram on individual boxes and labels were redesigned in October 2022 in order to improve the accuracy of authenticity determination.

Since June 2019, along with the World Bearing Association (WBA), JTEKT began adding a unique QR-code to verify the KOYO and JTEKT branded bearing authenticity by scanning the QR-code found on the individual box label via the WBA Check app.
