

Ladder Fall Protection Systems

IBT Offers Ladder Safety Systems For New OSHA Fall Protection Standards

Designed to meet the requirements of the new ANSI Z359.16 standard.

OSHA's New Ruling Requirement:

OSHA now requires all vertical ladders over 24' to have a personal fall arrest or ladder safety system.

IBT Offers the Latest Vertical Safety Solutions from 3M and Honeywell

Adding or upgrading your vertical safety systems just got easier. These lightweight systems are streamlined for easy installation and maintenance on a variety of structures—such as fixed ladders and towers. They have also been designed to meet the requirements of the new ANSI Z359.16 standard, helping you to stay in compliance with the current fall protection standards.

Systems are available in easy-to-install kits or can be customized for your application with additional available components, including:

- Brackets for larger ladder rungs
- Brackets to attach to ladder side rails
- Foldable foot rests for long ladders
- Shaft entry device to provide easy access to manholes and roof hatches
